Shweeb®

The Shweeb is the world's first human powered monorail race track: two 200m long overhead rail circuits from which hang high-performance pedal-powered vehicles. The aerodynamic, super-comfortable, low-rolling resistance vehicles have seven gears and can easily be ridden at over 50kph. On the curves, the vehicles swing out centrifugally to over 60° from vertical, for a thrilling and dynamic ride. You can race against the clock, race a partner, or team up for a two-on-two race.
